

Take control of PKU with Avonil tablets

Prekulab's pioneering Avonil AA tablets provide the amino acids, vitamins and minerals needed each day as a PKU patient, while following a highly controlled diet.

Key facts

- All essential AA and all non-essential AA except Phe + multiple vitamins and minerals
- For children and adults
- No sugar content
- No allergens
- No reported side effects

- Avonil is suitable for all types of Phenylketonuria (PKU) and Hyperphenylalaninemia (HPA).
- The tablets are odourless, flavourless and easy to swallow. They use an advanced coating technology for slow release, avoiding a high concentration of acid in the stomach to help keep Phe levels more stable.
- Avonil tablets are suitable for maternal PKU patients.

Well proven

Avonil's pioneering AA formulation in tablet form has demonstrated proven performance for decades. Avonil tablets have been subject to continuous optimisation over the years.

Dosage and administration

Avonil tablets must be supplemented with a low protein diet under strict medical supervision. The recommended dosage of tablets depends on the patient's age, body weight, physical activity, medical condition and the ability to metabolise natural protein.

The tablets should be divided into three or more dosages and distributed over the day together with food. Not suitable as a sole source of nutrition.

Avonil tablets can be combined with Avonil powder or another amino acid formula. It can also be combined with a Large Neutral Amino Acid product such as PreKUnil or NeoPhe.

Storage

Store in a cool, dry place away from direct sunlight. When not in use, reseal and keep can closed. Dispense from the original can. The expiry date refers to an unopened and correctly stored can.
